Skills Tutorial

Zero to Hero Guide

AI Agent Skills System

Improve Development Efficiency

Enhance Code Quality

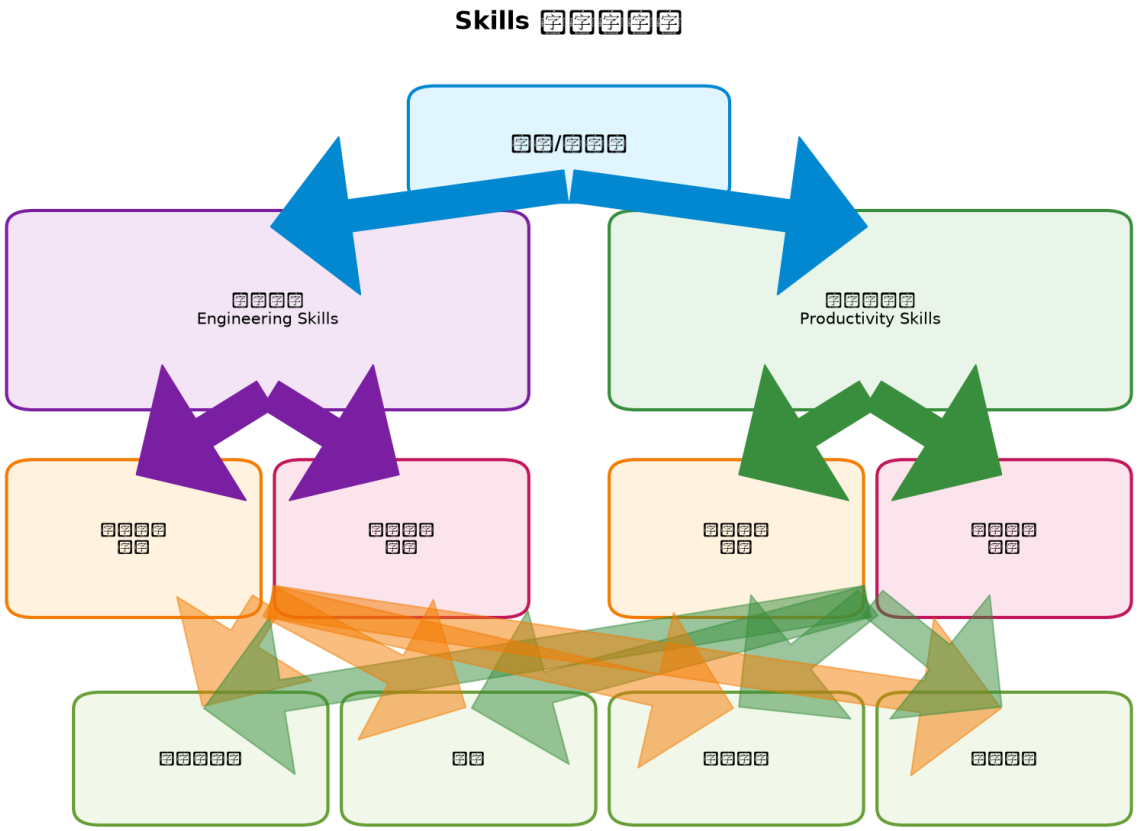

Tutorial Overview

This tutorial uses 5 diagrams to help beginners quickly understand the core concepts and usage of the Skills repository.

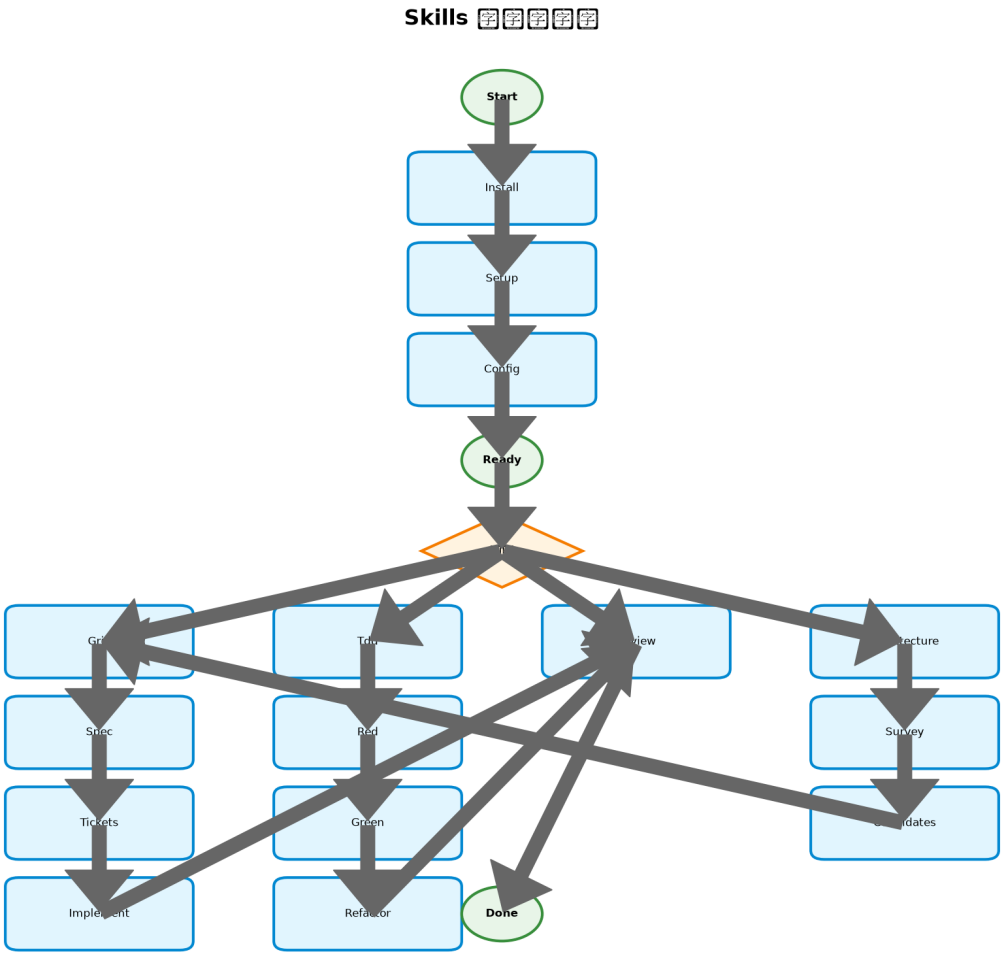

Diagram List:
1. Overall Architecture - Understand the structure
2. Workflow - Master daily development workflows
3. Installation Steps - Learn how to install
4. Skills Comparison - Understand each skill
5. Core Concepts - Understand key concepts

Learning Path:
- Beginners: Architecture -> Installation -> Concepts
- Advanced: Comparison -> Practice -> Community

1. Overall Architecture

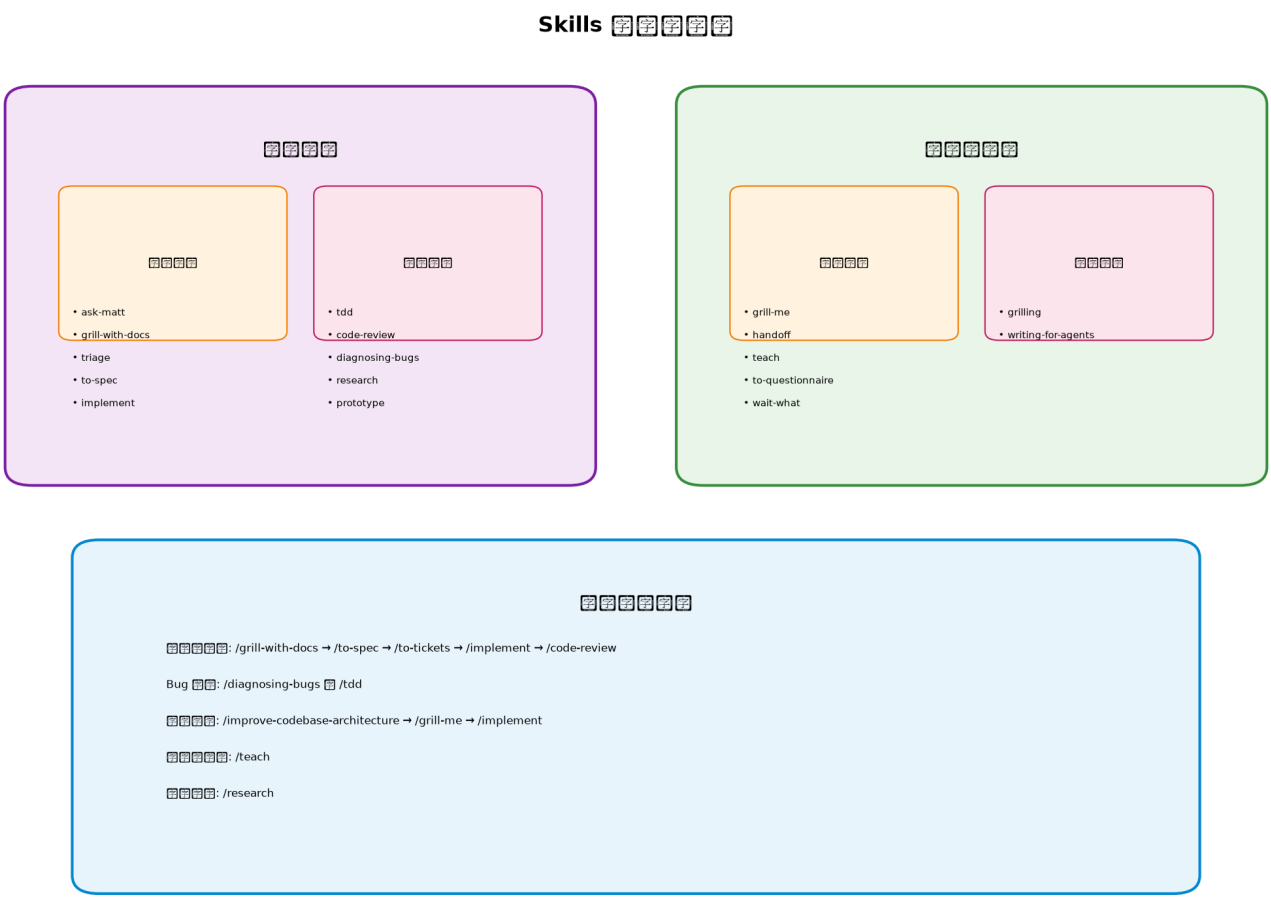

2. Workflow

Skills Classification

Engineering Skills

User-Invoked Skills:

- ask-matt - Ask which skill fits your situation
- grill-with-docs - Deep interview + documentation
- triage - Issue classification
- to-spec - Create specifications
- implement - Implement features
- wayfinder - Plan large tasks

Model-Invoked Skills:

- tdd - Test-driven development
- code-review - Code review
- diagnosing-bugs - Bug diagnosis
- research - Technical research
- prototype - Prototype design

Productivity Skills

User-Invoked Skills:

- grill-me - Deep interview
- handoff - Handoff documentation
- teach - Teaching functionality
- to-questionnaire - Create questionnaire
- wait-what - Clarify misunderstandings

Model-Invoked Skills:

- grilling - Interview primitive
- writing-for-agents - Writing for agents

Quick Start

Install Skills (30 seconds):

```
# Method 1: Claude Code Plugin (Recommended)
claude plugins install mattpocock-skills

# Method 2: npx skills
npx skills@latest add mattpocock/skills
```

Run setup command:

```
/setup-matt-pocock-skills
```

Start using:

```
/grill-me          - Deep interview for new features
/tdd               - Test-driven development
/code-review       - Code review
/ask-matt          - Ask which skill fits
```

More Resources

Official Resources:
- Repository: https://github.com/mattpocock/skills
- Website: https://skills.sh
- Documentation: https://skills.sh/mattpocock/skills

Learning Tips:
- Start with simple skills, gradually go deeper
- Practice oriented, theory as supplement
- Use shared language to improve efficiency
- Regular review, continuous improvement
